Online at www.TheNatureInstitute.org or at

The Nature Institute's Talahi Lodge located at 2213 South Levis Lane in Godfrey, IL

TNI MEMBERS—SPECIAL REGISTRATION DAY

Thursday, March 14, 2019 starting at 9 a.m. at The Nature Institute's Talahi Lodge

If you are a current TNI member or want to become a member, you will be able to register your camper one day early, ahead of the crowd! Members will only be allowed to register campers in their immediate family.

Camp Descriptions:

Explorers (3-6 years)- Camper must be potty trained

Backbone Not Required- June 3-7, 2019 – 8:30 a.m. to noon

What do insects, spiders, snails, and centipedes have in common? They've got no spine! It takes a strong outer shell and some wild adaptations to be a spine-less creature in the natural world. Join us for a week of investigation in decomposers, predator-prey relationships, and games that help us understand the strange characteristics of invertebrates.

Habitats are Hip- July 22-26, 2019- 8:30 a.m. to noon

How would you become invisible in your own backyard? Come think like an animal and discover the critters hiding in plain sight! Find out which species are on the prowl, which are clever in the way they escape, and how all the living things around us are connected.

Adventurers (age 6-9)

Branching Out- June 10-14, 2019 – 8:30 a.m. to 3 p.m.

Tall trees, short trees, fallen trees, and snags – each one plays an important part in the forest ecosystem! During this week of bark, branches, twigs, and stumps, get to know the quiet giants of the forest through up-close examination, sensory learning, and stealth games. Come and explore with us and have a “tree-mendous” week!

Let's Wing It- June 17-21, 2019- 8:30 a.m. to 3 p.m.

Why doesn't a woodpecker get a concussion? How can a falcon fly so fast? Could a hawk see an ant from the top of a 10-story building? Why do crows always bother predatory birds? Hone your “owl eyes” to find a new feathered friend during this week-long, winged adventure and find out what the birds might be telling us about the natural world!

Marvelous Mammals- July 8-12, 2019 – 8:30 a.m. to 3 p.m.

I am warm, fuzzy, and always on the lookout for food. What am I? During this week, you will learn the remarkable traits and adaptations that make mammals the masters of their environment. Become a crafty coyote, a restless rodent, or a burrowing bunny and try to survive the food chain.

Wild Watersheds- July 15-19, 2019 – 8:30 a.m. to 3 p.m.

All water goes downhill, but where does it end up, and how does it change the land? Investigate the ecology of the river, the upland forests, and the soggy wetlands that are home to many birds

Pioneers (age 9-12)

Having a Blast with Chloroplasts- June 24-27, 2019 – 8:30 a.m. to 3 p.m. *Thursday, June 27 until 10 p.m.

Turning sun into sugar is tricky business, but it is a full-time job for the ground plants, mosses, and ferns around us! Get down and dirty during this week of herbaceous investigation and discover how the plants at our feet become a source of water, shelter, food, or in some cases – delicious teas and medicine!

Junior Camp (12+)

July 29-Aug 2, 2019 – Times will vary- This camp is designed to allow experienced campers to dive deep into nature exploration and a deeper understanding of the world around them. Campers are given the opportunity to learn new skills, have new experiences and attend an overnight camping trip at The Nature Institute.
